SUMMARY

Aspiring AI/ML Engineer and current BCA student with a strong foundation in Python, data analysis, and algorithmic logic. Deeply interested in intelligent systems, prompt engineering, and predictive modeling. Seeking an internship where I can apply my Python skills, explore machine learning workflows, and contribute to building data-driven AI solutions.

EDUCATION

Bachelor of Computer Applications (BCA) — 2024 – 2027

Kaushalya The Skill University, Ahmedabad — Currently in 5th Semester

Higher Secondary (12th Standard) — 2023 – 2024

IP English School

SKILLS

- Core Languages: Python, Java , HTML, CSS
- AI & Data Skills: Prompt Engineering, Data Analytics
- Database Management: MySQL
- Developer Tools: Git, GitHub, AI Development Environments

PROJECTS

Prompt Forge | *AI Prompt Optimization & Engineering Tool*

- Designed an AI utility application that acted as middleware, transforming simple, single-line user inputs into optimized, structured prompts for Large Language Models (LLMs).
- Engineered context-structuring logic that reduced token overhead, cutting down API token consumption and compute costs for users.
- Analyzed LLM behavior to resolve output formatting issues, ensuring higher consistency and quality in generated AI responses.

Vortex Alpha | *AI-Assisted Financial Sentiment Tracker*

- Built a web platform that aggregated upcoming IPO data and tracked Grey Market Premium (GMP) indicators to gauge retail market sentiment.
- Developed algorithmic rules to process financial trends, automatically calculating risk metrics to flag safe vs. high-risk investment opportunities.
- Utilized rapid AI-driven development methodologies to prototype data ingestion pipelines and build a clean, responsive UI.

Portfolio Website | *Personal Developer Showcase*

- Created a responsive web portfolio to present technical projects, certificates, and coding proficiency.
- Explored automated, prompt-driven software engineering workflows to accelerate frontend deployment and UI element animations.

CERTIFICATIONS

- Deloitte — Data Analytics Job Simulation (June 2026): Focused on data interpretation, dashboards, and analytical thinking.
- Scaler Topics — Python Course for Beginners (May 2026): Mastered core language syntax essential for data science.

INTERESTS

Artificial Intelligence, Machine Learning, Data Analytics, Natural Language Processing (NLP)
